ABOUT US

WHO WE ARE

Fugun Printing & Packaging is an independent Taiwanese company based in Taipei that specializes in printing and packaging solutions. For over 45 years we have been producing quality print and packaging solution for industry sectors ranging from cosmetics, pharmaceuticals, art and craft supplies to wine and food packaging. As one of the leaders in the printing industry, our dedicated teams take pride in our end-to-end solutions that covers every step from design to delivery. We provide personalized service on a wide range of printing needs from small to large scale product runs for our global customers in Japan, USA, Mexico, Philippine, Australia and South America. Our experienced sales team and printing technicians are always ready to help with your printing and packaging requirements.

OUR QUALITY

Fugun Printing & Packaging has a Quality Assurance and Quality Control team that is focused on producing the highest quality print products. At Fugun we strive to be the benchmark in the printing industry for cutting-edge technological solutions and product innovation.

Our machinery includes a high-end KBA Rapida 106 offset printer, Man Roland 700 HiPrint offset printer, Emmerci Automatic rigid box machine, specialized planer machine (for box set-up), Rotary die-cutter, Automatic flatbed die-cutters, Folding and gluers as well as an extensive range of specialized equipment for producing playing cards and trading cards.

Our factory has ISO9001 and ISO14001 international certification but we are always striving to improve on production and operational management, with a focus on quality and exceptional technology capability.

We currently provide services to national and international companies with the aim of building long-term, loyal relationships with both our customers and suppliers.

**KBA-Rapida 106:
5+1 HIGH-END SHEETFED OFFSET PRINTER**

In October 2016 we became the first company in the Asia Pacific region to install and operate the German made high speed printer.

It has a production capacity up to 20,000 sheets/h, making it the fastest and most efficient press in its class. The substrate flexibility of the press is unrivalled – it is capable of handling materials from lightweight paper to heavy board, from plastic films to corrugated packaging. You can expect the same of the finishing touches: Gloss or matt effects, all-over or spot finishes, single and multiple coating applications with dispersion and/or UV varnishes.

TECHNICAL FEATURES:

1. Fully Automatic Printing Plate Exchanger

When a printing run is finished the old printing plate is automatically replaced with a new one, thus dramatically improving the efficiency and improve accuracy of replacement work.

2. All-in-one operation stand

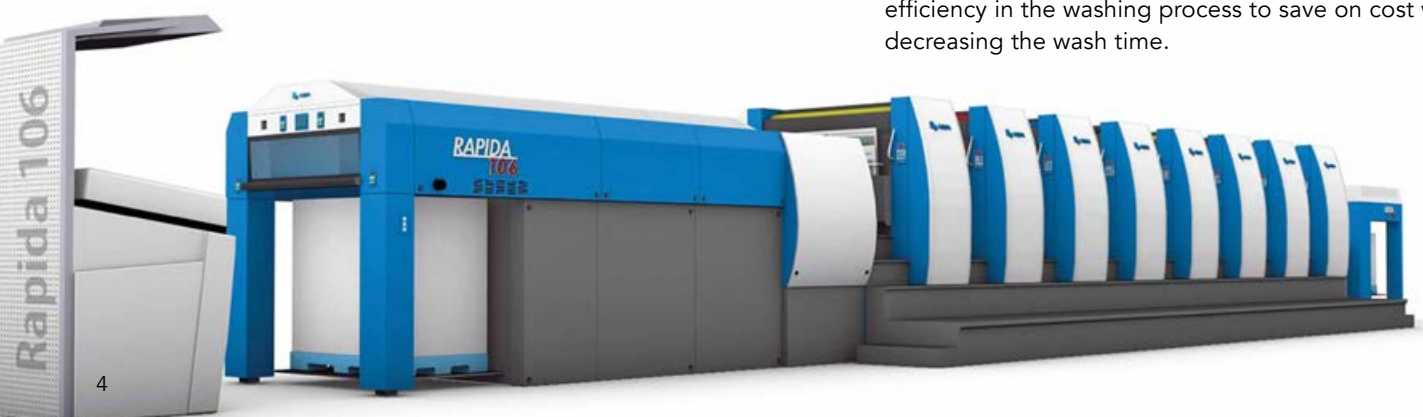

In addition, sensors can be installed to measure and monitor the density of printed matter, register presetting and plate identification.

3. Spectroscopic color tone control device

A system that supports quality evaluation for printing operators. Scan the color bar on the printed matter, measure density, dot gain, color, color difference, etc. and display it on the monitor easily for even greater fidelity and accuracy of the print color.

4. Automatic blanket impression cylinder washing

Automatic control program reduces waste and improves efficiency in the washing process to save on cost while decreasing the wash time.

ROLAND 700 HiPrint: 6+1 SHEETFED OFFSET UV PRINTER

The ROLAND 700 HiPrint handles stock thicknesses from 0.04 mm upto 1 mm as well as PVC foil, making it a genuinely versatile press for every substrate from papers to packaging, cartons and plastics. With inline coating and quality control options and configurable with up to 12 printing units, straight or perfecting, the ROLAND 700 HiPrint is suitable for a diverse array of print applications.

TECHNICAL FEATURES:

- Simultaneous Plate Loading (SPL™) for significant reductions in make-ready time
- Brand new 'suction belt' sheet-guiding technology
- Maximum printing speed up to 17,000 sheets/h
- New ink jet sheet numbering system for pinpoint accuracy in identifying errors

Max. sheet format (mm)

Standard format 740 x 1040
Special format 3B plus: 780 x 1050
Special format: 740 x 1050 Max.

Image area (mm)

Standard 715 x 1020
Special format 3B plus: 770 x 1030
Special format: 730 x 1030

Substrate thickness range (mm)

0.04 to 1

MACHINERY

EMMERC: MC2004MEB Auto RIGID BOX MACHINE

The MC 2004 MEB is a revolutionary mechatronic automatic line for the production of rigid set-up boxes, designed to obtain automatically. It is a fully automatic production line from card board folding, gluing the cover paper to perfectly wrap up and completed a gift box.

Largest box size: 600(L) x 400(w) x 210(h) mm

Smallest box size: 83(L) x 31.5(w) x 12(h) mm

Turn in depth: minimum 7mm - maximum 35mm

Maximum Capacity: 38,000 boxes daily

YOCO JY-106E: AUTOMATIC DIECUTTER

TECHNICAL SPECIFICATIONS:

- **Maximum sheet size:** 1650x1200mm / **Maximum cutting size:** 1630x1190mm
- **Minimum sheet size:** 650x520mm
- **Minimum gripper margin:** 6 mm / **Minimum gripper waste:** 12mm (distance from first knife to paper edge)

- **Maximum diecutting pressure:** 400 tons
- **Sheet thickness:** Cardboard- minimum $\geq 350\text{g/m}^2$
Corrugated paper 1-7mm
- **Diecutting plate size:** 1680x1186mm
- **Cutting knife height:** 23.8mm
- **Maximum Diecutting speed:** 5000 sheets/hour

WORK FLOW

OVERVIEW

Our products cover a wide range of uses such as, packaging, luxury rigid box, bag and folding carton. We also manufacture promotional and advertising items, board games, poker cards and education card or collectables trade discs. We have production lines from pre-press proofing, quality offset-printing, option of coating and finishing to various post-press applications.

We strive for the perfect balance in innovation and practicality; in manufacturing we demand the highest quality using the most advanced production technologies. Fugun's vision is to offer outstanding quality and reliability that our clients can depend on. Contact us today and let our dedicated team assist you with your next printing project.

WORK FLOW- EASY 4 STEPS:

SATISFIED CUSTOMERS

DELIVERY

Complete the job in the schedule to our satisfied customers with high quality.

ECO GREEN PRINTING

Food-grade (Soy Ink)

The soy ink printing process release less than 5% Volatile Organic Compounds (VOC's) into the air improving the air quality for our staff and the environment. Soy ink is a helpful component in paper recycling because the soy ink can be removed more easily than regular ink from paper during the de-inking process.

Greener Printing with UV Ink

UV printing is fast becoming the new industry standard around the world because there are no solvents used. Solvent based inks are toxic and the main ingredients of these inks are Volatile Organic Compounds (VOCs). Solvent based inks produce toxic fumes which escape into the atmosphere contributing to air pollution and Methane, a greenhouse gas, (part of VOCs) contributes to enhance global warming.

Environmentally Friendly (Water Based Ink)

Water-based inks, water-based polymer resins, emulsions, organic pigments, solvents to reduce volatile organic compounds out (VOCs) polluting emissions.

We encourage using recycle paper

FOLDABLE PAPER PACKAGING

RIGID BOX STYLES

LABELS / STICKERS / TAGS

LUXURY GIFT BOX (RIGID BOX)

LUXURY GIFT BOX (RIGID BOX)

Options: Spot UV, Embossing, Debossing, Foil stamping, Soft touch coating and Laminating.

Production capacity:
approx. 15,000 boxes daily

- Neck and Shoulder Box -3 pieces
- Hinged Box
- Two Pieces Telescoping
- Drawer Style
- Collapsible
- Clamshell Box

***Insert option:** paper, Eva Foam or user interaction booklet.

RIGID BOX STYLES

Rigid Boxes are high-end luxury packaging which made from thick cardboard that is formed into its permanent shape and then laminated with custom printed or stock paper during the fully automatic manufacturing process. We are one of the leading company in Taiwan manufacturer, supplying the various custom rigid gift boxes.

Capacity: approx. 15,000 Boxes daily

TWO PIECE TELESCOPING

(Lift-off 2 pieces)

The classic telescoping rigid box. The product is displayed in the base. The lid fits squarely on top and holds the contents in place. The top lid covering the bottom base fully or partially it is important that the top lid fit perfectly to the base box at the same time its can be easily lift off.

SHOULDER STYLE

(3 pieces)

Three-piece box with a two-piece base assembly, allowing the lid & the base to meet flush on the exterior of the box. This can be constructed with either a standard, hidden or exposed shoulder.

DRAWER STYLE BOXES

The drawer box is also called slide box with 2 parts, the outer cover box and the inner tray box. Outer cover can have opening on one sides or both sides which will be a sleeve cover for the inner tray.

HINGED BOXES

The lid is wrapped and hinged to the base with an extension of the flip lid. The flip lid can be either flash with the base or longer double flip lid to shutting clasps. There are options of using magnet, velcro or ribbon to closure hinged boxes.

COLLAPSIBLE BOXES

This is a foldable hinged box set-up that allows compact flat storage. It can significantly reduce transportation and storage cost. Its design is to simply fold up into a box shape with magnetic lids.

CLAMSHELL RIGID PAPER BOX

The clamshell rigid paper box is a hinged lid set up box that combines 2 standard boxes which opens and closes like a clamshell. The benefit of this design is that it allows for two presentation areas when open.

COSMETICS & PHARMACEUTICALS PACKAGING

Skin Care / Cosmetic / Perfume / Candles / Health supplement

CUSTOM PAPER PACKAGING

We offer solutions for all types of premium, customized, on-shelf retail packs with full-colour, litho laminate printing, such as paper palette, boxes for skincare products, sunscreen, eye liner, eye gel, lipstick, facial cleanser, creams or ointments, lotions and facial mask.

PACKAGING DESIGN:

- Pillow Box
- Sleeve Box
- Straight tuck end box style (STE)

PAPER TYPE:

- Fine textured art paper
- Patterned paper
- Specialty art paper with soft touch
- Silver-metallic paper

COATING AND FINISH:

Glossy, matte laminating, soft touch, varnishing, spot UV, embossing, gold printing, silver printing, debossing, gold, silver, various color foil stamping options are available.

Insert option: Miro Flute corrugated board/ user instruction

TRANSPARENT PLASTIC PACKAGING

Material: PVC, PET and PP

Options: Transparent or frosted finishes at levels of saturation and effects.

Transparent folding boxes provide unique and creative packaging designs with extra toughness and high transparency suitable for retail packaging.

- Window Box
- Retail Display with Hook
- Clamshell Blister Packaging

MULTI-PAGE MINIATURE LEAFLETS INFORMATION BOOKLET

FOLDING CARTON PACKAGING

CUSTOM PAPER PACKAGING

We offer solutions for all types of premium, customized, on-shelf retail packs with full-colour, litho laminate printing, such as paper palette, boxes for cosmetic and pharmaceutical products, food and chocolate packaging.

Packaging design:

- Pillow Box
- Sleeve Box
- Straight tuck end box style (STE)

- Straight tuck end box style (STE)

STICKERS/LABELS

High-quality full-colour labels and stickers for a large range of labelling applications. We can produce almost any shape or size to suit your creative requirements. We are **HACCP certified** and provide food-safe labels and stickers for a range of products.

Materials: Art paper, Polyester, Woodfree paper, Pearly paper, Synthetic Paper, and etc.

Applied: packing, item express, stock management, car bumper, food, beverage and etc.

EXTRA

We stay abreast of the latest developments in design, manufacturing process and equipment, paper grades and printing skill to provide our customers with the best in packaging innovation.

FOOD PACKAGING

RETAIL PACKAGING

- **Custom Shapes :** Window box, Pillow box, Chocolate Bars
- **Finishing Types :** Gloss Lamination, Matte Lamination, Gloss AQ, Gloss UV, Matte UV, Spot UV, Embossing, Foiling.
- **Included Options :** Die Cutting, Gluing, Scoring, Perforation

Feature: Flat Shipping

TAKEAWAY / CARRY BOXES

Paper Carrier: Solid Bleached Board (SBB) thickness 200 gsm-600 gsm. This is a medium density board that caters to the high requirements of graphical and packaging products. The material is hygienic and therefore suitable for packaging aromatic and flavour sensitive products.

Corrugated Carrier: E flute corrugates thickness 2-4 mm. It has strong cushioning properties and structural strength. The single face E flute corrugates is often used to carry heavier weight items and suitable for litho laminated high quality printing cartons.

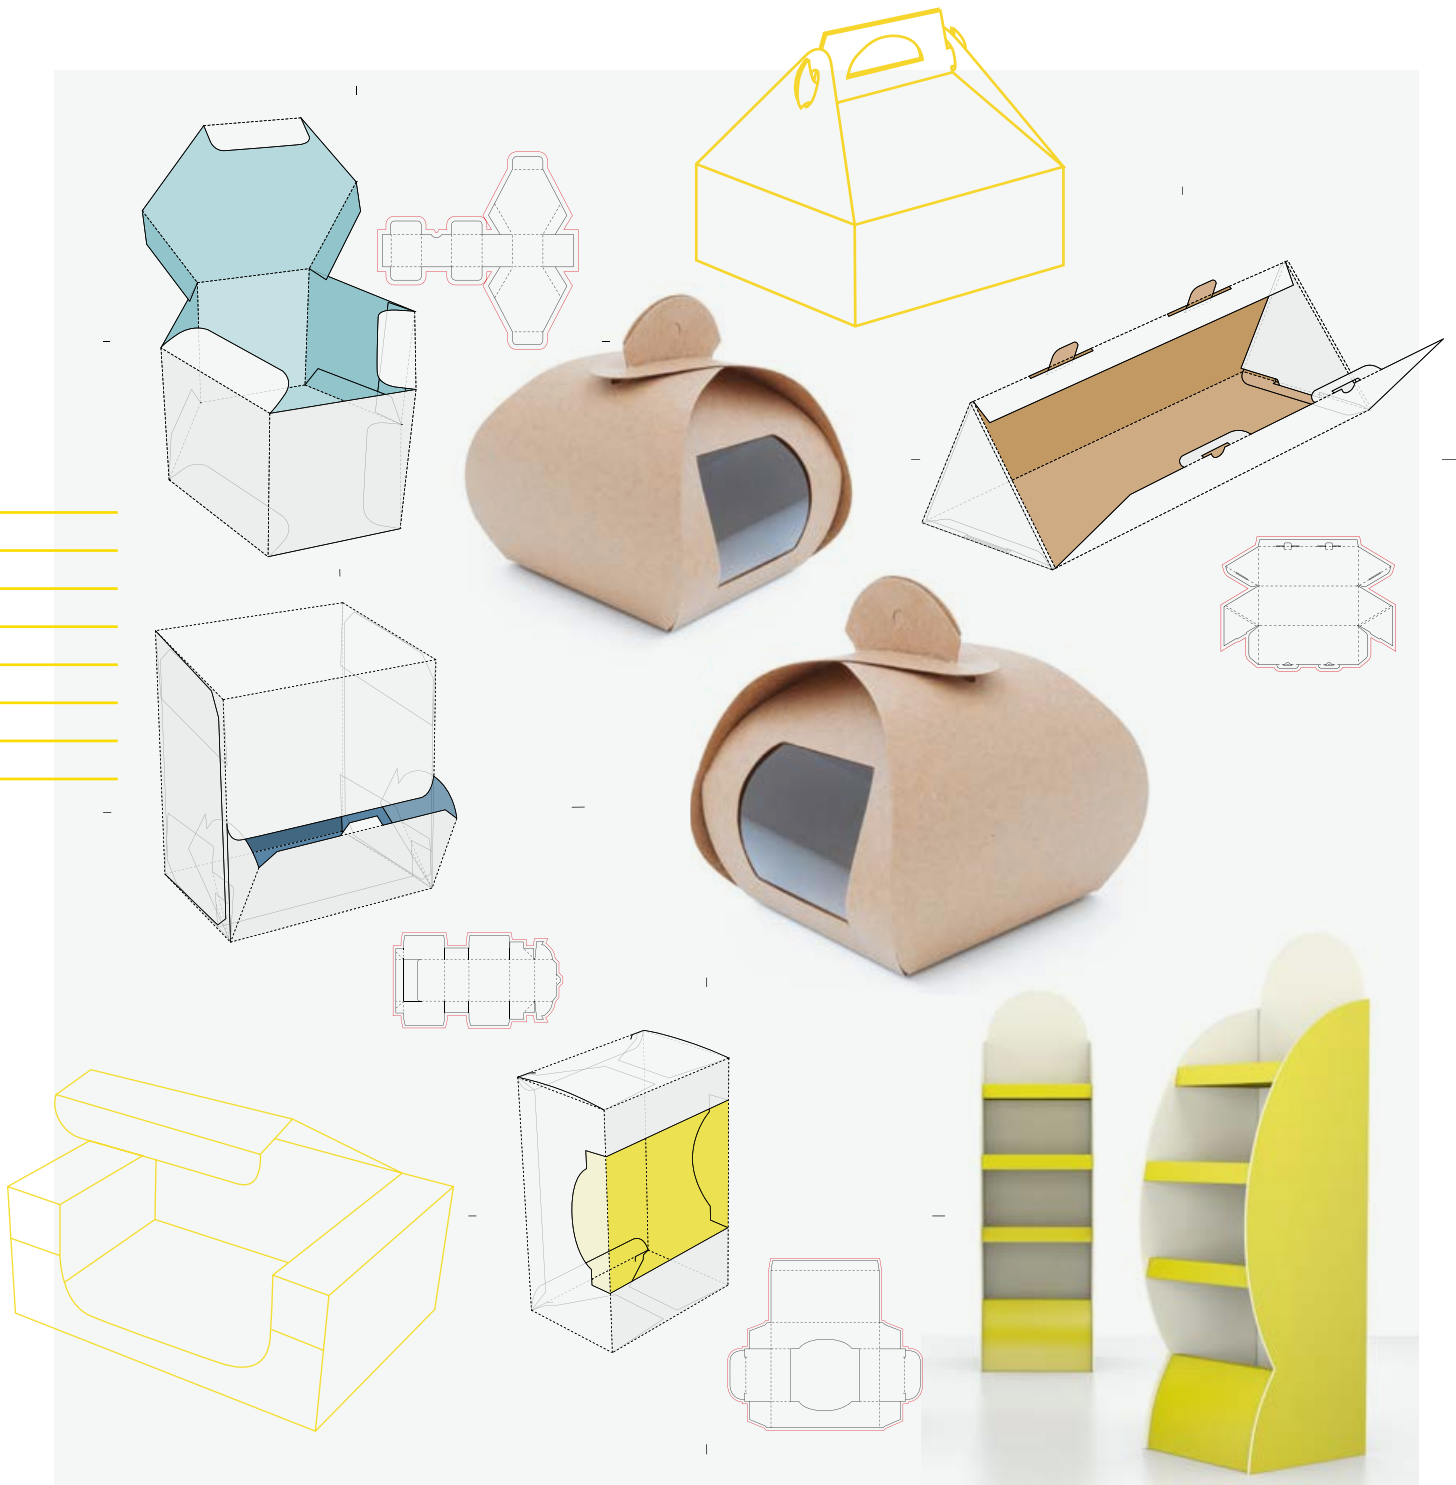

Option: water/oil resist coating

FROZEN FOOD DISPLAY BOXES

For frozen food items, we use durable cardboard with water/oil resist coating material to cope with moisture.

Feature: water/oil resist coating

KRAFT PAPER FOOD TRAY

The kraft paper trays are perfect for cafes and takeaway shop. The environmentally friendly recyclable paper is versatile for handling different types of hot and cold food.

DISPLAY CORRUGATED STAND

Custom corrugated floor displays or over-the-counter top for the retail environment.

TRANSPARENT PLASTIC PACKAGING

PVC Most economical material used.

PET Commonly used in the food and pharmaceutical industries when an FDA approved package is required.

POLYPROPYLENE Typically used when frosted or hazed effects are desired.

LUXURY CHOCOLATE GIFT BOXES

- Hinged Lid
- Neck and Shoulder Box (3 pieces)
- Telescoping Box (2 pieces)
- Drawer Style
- Collapsible

Capacity: approx. 15,000 Boxes daily

Rigid Boxes are high-end luxury packaging made from thick cardboard and formed into its permanent shape. This is then laminated with custom printed or stock paper in a fully automatic manufacturing process. We are one of the leading company in Taiwan for supplying various custom rigid gift boxes.

Options: Spot UV, Embossing, Debossing, Foil stamping, Soft touch coating and Laminating.

CHOCOLATE BARS

LIQUOR PACKAGING

WINE RIGID GIFT BOXES

- Hinged Lid
- Neck and Shoulder Box (3 pieces)
- Telescoping Box (2 pieces)
- Drawer Style

Corrugated Boxes are available in offset lithography printing and UV offset printing. **Glossy, matte laminating, varnishing and UV varnishing** finishes are available. The corrugated box with the printing inside and out is one of our featured products.

Multiple layers of B flute, E flute corrugated board are mostly used for Shipping Cartons. The **3-layer B flute corrugated box** is 2.5mm in thickness while the **2-layer E flute corrugated box** is 3.5 mm in thickness and has the better weight capacity. It is widely used for the retail packaging such a beverage shipping carton and retail packaging.

Box Style:

- Shipping Carton
- Handle Style
- Mailer Box
- Truck Top

LABELS / STICKERS / TAGS

We produce and customize labels to all shapes and sizes for your creative requirements, from cosmetics, pharmaceuticals to beverage products. We provide stickers for a large variety of labelling applications. We are **HACCP certified** and can produce food-safe labels and stickers for a range of products.

Materials and Finishes: Paper, Polyester, Transparent Vinyl, Woodfree Paper, Pearlescent Paper, Synthetic Paper, Metallic Foil, BOPP (Biaxially Oriented Polypropylene)

LAMINATED LABELS

(Matte/Glossy)

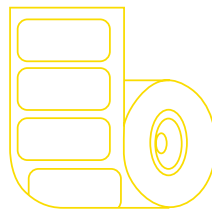

Glossy lamination adds a reflective shine to the label. It is commonly used in pharmaceuticals, cosmetics suppliers and beverage bottlers. The Matte finish adds a duller sheen and smoother touch and also reduces smearing for handwriting.

MACHINE ROLL LABELS

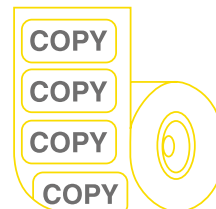

(Matte/Glossy)

Roll labels is ideal for machine automation as it can be auto-dispensed. Roll labels can be applied to bottles, shaped containers or flat surfaces.

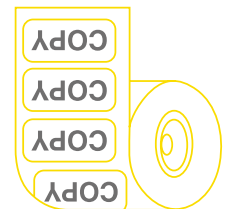

Here are the 4 different orientations for the roll labels

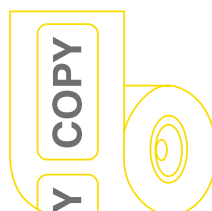

No Preference

Top First

Bottom First

Right Side First

Left Side First

BARCODE LABEL

Barcode label is typically used for inventory management and product tracking. The content of the label can be changed by operating the barcode machine so it is widely used in many industries.

(We can customize your label)

SECURITY STICKERS

Void Label / Fragile Label / Hologram Label

SCRATCH-OFF STICKERS

For Instant Win Lotteries & Promotions

The scratch-off stickers are ideal for instant-win lotteries and promotions. The message is printed and then concealed under a transparent label with silver-grey coating. The coating can be easily scratched off to reveal the message.

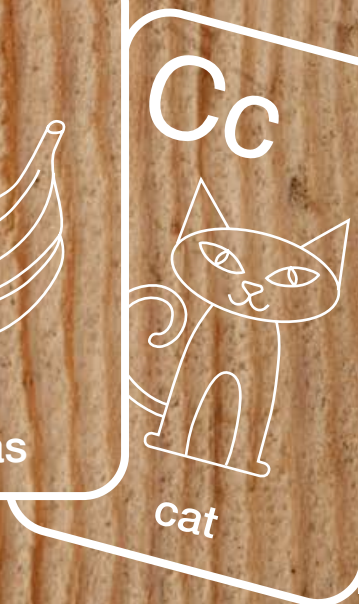

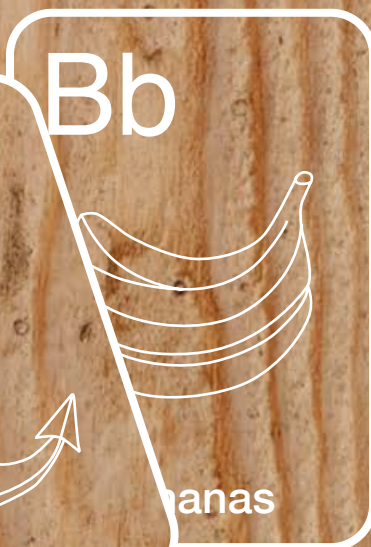

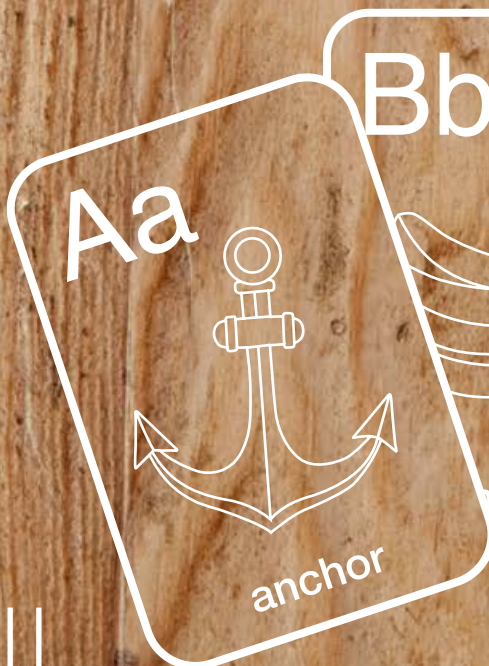

HANG TAG

PLAYING CARD

BOARD GAMES & CARDS
POKER CARDS

Collectible Cards / Custom Board Games / Educational Flash Cards / Tarot Cards / TCG Trading Card Games

BOARD GAMES & CARDS

Collectable Cards / Custom Board Games / Educational Flash Cards / Tarot Cards / TCG Trading Card Games

We specialize in cards and board games, using production lines for the rapid production of games with multiple parts and specifications including:

- Player mat and game board
- Fine quality playing cards
- Rule booklet
- Game pieces: dice, tokens and meeples

Tokens (thickness 1.0-3.5mm) are made by die cutting compressed solid cardboard overlaid with printed artworks (punchboard). This allows the tokens to be easily separated from the punchboard.

PAPER TYPES

- **270 gsm Standard Card** with Graycore
- **300 gsm Smooth Card** is the standard cardstock on the market. Varnishing provides a glossy surface suitable for shuffling and handling. Ivorycore / Blue core
- **330 gsm Premium Smooth Card** uses German art paper considered to be one of the finest material for playing cards. This card stock is excellent for vivid graphics or artworks and has a durable, smooth finish. Blackcore (Premium)
- **Linen Air Card (310gsm)** use master quality art paper from Italy. This card stock is extra durable and the superior handling make them the most popular material. The deep air pockets on the card surface traps air for silky smooth handling. Blackcore (Premium)
- **100% Plastic Card Stock (thickness 0.31 mm) made from PVC or PP.** This plastic card stock is highly flexible, water resistant and durable. It can be printed on a transparent or white background.
- **3D lenticular Card**

CARD'S FINISH STYLES

Varnish is the most common finish used for playing cards. This liquid finish is applied by the offset printing press.

Options include silk or satin varnishing / Spot UV or All-over UV Varnishing

Lamination (gloss or matte) is the most protective finish in addition providing water resistance.

Lamination is available in **Gloss** which adds a reflective luster to your cards, while **Matte** adds a duller finish and smoother touch. We also offer an anti-scratch matte lamination.

Aqueous (AQ) Coating is a water-based protective card coating that is environmentally friendly and free of VOC emissions.

EXTRA INFORMATION:

Lamination (gloss or matte) is the most protective finish and makes your cards water resistant.

Lamination is available in gloss, matte, and as an anti-scratch matte lamination **Gloss** adds a reflective shine to your cards, while **matte** adds a duller shine and smoother touch.

Aqueous (AQ) Coating is a water-based coating that is environmentally friendly and free of VOC emissions. The advantage is that it reduces the need for powder on the printing press. AQ coating can also be used to provide the print product with yellowing-resistance when packagings are in storage for extended periods of time.

BOXES AND PACKAGING

PROMOTIONAL SYSTEM AND PRINT

COUPONS, VOUCHERS, DISCOUNTS AND FREEBIES

We help our customers design incentives for marketing campaigns. From scratch cards, raffle tickets, peel-and-win labels to products printed with functional ink such as scratch-and-sniff and light reactive cards. These products can be fully customized to suit different types of promotions.

- 1. Instant Scratch-its** This is the most popular of all game card products, offering a perfect combination of an instant win promotion that is very cost effective. The card can be designed to incorporate a Unique Reference Number for data capture opportunities when consumers are directed to a website or to dial a free phone number to provide personal information.
- 2. Raffle Tickets:** These custom raffle tickets are unique because they allow participants to instantly win smaller prizes and yet still enter the raffle to win the grand prize.
- 3. Peel-and-Win** This mechanic consists of two layers of material which securely hides the consumer message between the layers.
- 4. Scratch & Sniff :** Add The Power of Smell To Your Next Promotion! Our scratch and sniff cards are printed in full color on both sides of a premium card stock applies with a special encapsulated Micro-Fragrances ink in the scratch and sniff area.
- 5. Light Reactive:** This is an innovative technology using invisible ink to print messages that are revealed under a UV light! An exciting interactive concept for experiential promotions, exhibitions and retail promotions guaranteed to drive consumer's traffic to your store. Incorporate this ink onto a wristband for wearable consumer promotional product or die cut to the brand shape for extra impact.
